SAFETY DATA SHEET B-3204

SECTION 1 - MATERIAL IDENTIFICATION AND USE

Manufacturer's Name : PMC Water Systems Services Inc.

Manufacturer's Address : 124 Connie Crescent, Unit 9, Concord, ON L4K 1L7

Manufacture's Phone # : (905) 669-8262

24 Emergency Phone # : Canutec (613) 996-6666

Product Identifier : B-3204

Product Use : Water treatment/return-line protection

SECTION 2 – COMPOSITION/INGREDIENTS OF MATERIAL

IngredientsConcentrationCAS #LD50LC50Diethylaminoethanol10-30%100-37-81300 mg/kg (oral – rat)4.6 mg/l, 4h (rat)Cyclohexylamine20-30%108-91-8156 mg/kg (oral – rat)No Data Available

SECTION 3 – HAZARDS IDENTIFICATION

Hazard Statement

Causes serious eye damage. Causes severe skin burns and eye damage. Toxic if swallowed. Suspected of damaging fertility or the unborn child. Flammable liquid and vapor

Precautionary Statement Keep away from heat/sparks/open flames/hot surfaces. No smoking. Keep container tightly closed. Ground/bond container and receiving equipment. Use explosion-proof electrical/ventilating/light/equipment. Use only non-sparking tools. Take precautionary measures against static discharge. Do not breathe dust/fume/gas/mist/vapors spray. Wash thoroughly after handling. Wear protective gloves/protective clothing/eye protection/ face protection.

If swallowed: Rinse mouth. Do NOT induce vomiting. Call poison center or doctor. If on skin (or hair): Remove/ Take off immediately all contaminated clothing. Rinse skin with water/ shower. If inhaled: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If in eyes: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/physician. Wash contaminated clothing before reuse. In case of fire: Use dry chemical for extinction. Store in a well ventilated place. Keep cool. Store in a secure manner. Dispose of contents/container in accordance with local/regional/ national/international regulations.

SECTION 4 – FIRST AID MEASURES

Eye Contact Immediately flush eyes with plenty of water for at least 15 minutes and get medical attention immediately after

flushing. Hold eyelids open during flushing.

Skin Contact Immediately flush skin with plenty of water for at least 15 minutes. Get medical attention. Remove contaminated

clothing and launder before reuse.

Inhalation Remove person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, get immediate medical

attention.

Ingestion Do NOT induce vomiting. Never give anything by mouth to an unconscious or convulsing person. Slowly dilute with

1-2 glasses of water and seek immediate medical attention. If vomiting occurs spontaneously, keep head below hips to

prevent aspiration of liquid into the lungs.

Notes to Physician Absorption of this product into the body leads to the formation of methemoglobin, which in sufficient concentration causes cyanosis. Skin absorption symptoms may be delayed. Since reversion of methemoglobin to hemoglobin occurs

spontaneously after termination of exposure, moderate degrees of cyanosis need to be treated only by supportive measures such as bed rest and oxygen inhalation. Thorough cleansing of the entire contaminated body area is of

utmost importance.

SECTION 5 - FIRE FIGHTING MEASURES

Flammability
Flash Point
Flash Point
Flash Point
Flammable
57°C, 135°F
Autoignition
Flammable
Not Determined

Temperature

Extinguishing Media Water, water spray, carbon dioxide, foam or dry chemicals.

Special Firefighting Procedures and EquipmentFirefighters should wear full protective clothing, including self-contained breathing equipment. Vapors are heavier than air and may travel a long distance accumulating in low lying areas. Containers exposed to intense heat from fires should be cooled with water to prevent vapour pressure build-up which could result in container rupture. Static

electricity will accumulate and may ignite vapors. Prevent a possible fire hazard by bonding and grounding.

HazardousCarbon monoxide. Carbon dioxide. Oxides of nitrogen. Ammonia. Irritating aldehydes and ketones may be formed on burning in a limited air supply.

Products

NFPA Ratings Health 3, Flammability 2, Instability 0 HMIS Ratings Health 3, Flammability 2, Reactivity 0

SECTION 6 – ACCIDENTAL RELEASE MEASURES

Personal Precautions Safety goggles. Wear protective clothing and equipment.

Environment Precautions Prevent from entering into soil, ditches, sewers, waterways and/or groundwater.

in an appropriate waste disposal container. Avoid direct contact with material. Try to work upwind of spill.

SECTION 7 – HANDLING AND STORAGE

Handling For industrial use only. Avoid contact with eyes, skin and clothing. Do not ingest. Do not inhale vapour or mist. DO

NOT handle or store near an open flame, heat, or other sources of ignition. Use with adequate ventilation. Keep containers closed when not in use. Empty product containers may contain residue. Handle in accordance with good industrial hygiene and safety practices. Static electricity will accumulate and may ignite vapours. Fixed equipment as well as transfer containers and equipment should be grounded to prevent accumulation of static charge. DO NOT

pressurize, cut, heat, or weld containers.

Storage Store in a cool, dry, well-ventilated area away from direct sunlight. Store tightly closed in original container. Place Requirements away from incompatible materials. Containers of this material may be hazardous when empty since they retain

product residues (vapors, liquid).

SECTION 8 – EXPOSURE CONTROLS/PERSONAL PROTECTION

Ventilation Local exhaust ventilation as necessary to maintain exposures to within applicable limits.

Respiratory ProtectionSkin Protection
Skin Protection
Rubber or plastic gloves. Rubber boots. Chemical resistant clothing.

Eye/Face Protection Chemical safety googles; face shield

Other Comments An eyewash station and safety shower should be available

Exposure Limit - ACGIH Exposure Limit - OSHA Immediately Dangerous to Life or Health - IDLH

Diethylaminoethanol 2 ppm TLV 10 ppm PEL Not Available

Cyclohexylamine 10 ppm TLV-TWA 10 ppm TWA 40 mg/m³ TWA

SECTION 9 – PHYSICAL AND CHEMICAL PROPERTIES

Physical State : Liquid

Odour and Appearance : Fishy amine odour; colourless to pale yellow

Odour Threshold:Not AvailableSpecific Gravity (Water = 1):0.93 g/ccVapour Pressure (mmHg):Not AvailableVapour Density (Air = 1):Not AvailableEvaporation Rate:Not Available

 Boiling Point
 : 127° to 124°C, 261° to 273°F

 Freezing/Melting Point
 : -5° to -18°C, 23° to -4°F

 pH
 : 12.5, 10 (1% solution)

Solubility in Water : Miscible

SECTION 10 – STABILITY AND REACTIVITY

Stability/Reactivity Stable.

Conditions for Instability Avoid excessive heat, open flames and all ignition sources.

Incompatible Materials Oxidizers, strong acids, all copper alloys, lead and oxides of nitrogen

Hazardous Decomposition Nitrogen and carbon oxides.

Products

Hazardous Polymerization Hazardous polymerization will not occur.

SECTION 11 – TOXICOLOGICAL INFORMATION

Skin Contact : Skin contact will cause corrosive burns to tissues.

Eye Contact : Eye contact will cause corrosive burns to tissues.

Ingestion : Causes irritation or chemical burns of the mouth and gastrointestinal tract.
 Inhalation : Inhalation of vapors or mist will cause burns to the respiratory tract.

Chronic Exposure Effects : Prolonged or repeated exposure may result in lung damage and/or absorption of potentially harmful

amounts of material.

Irritancy:No Data AvailableSensitization:No Data AvailableCarcinogenicity:No Data AvailableTeratogenicity:Not AvailableMutagenicity:Not AvailableReproductive Effects:Not Available

SECTION 12 - ECOLOGICAL INFORMATION

General Comments Expected to slowly biodegrade in the environment. Not expected to bioaccumulate. Practically nontoxic to

an aquatic environment.

SECTION 13 – DISPOSAL CONSIDERATIONS

Waste Disposal Dispose in accordance with federal, provincial or local government requirements. Contact your local,

provincial or federal environmental agency for specific regulations. Empty containers should be recycled

or disposed of through an approved waste management facility.

SECTION 14 – TRANSPORT INFORMATION

TDG Shipping Regulations UN 2920, Corrosive Liquid, Flammable, N.O.S. (Cyclohexylamine), Class 8 (3, 9.2), PG II

Domestic Substances List All ingredients are listed on the DSL or are not required to be listed.

SECTION 15 – REGULATORY INFORMATION

WHMIS Classification Class B2: Flammable Liquid

Class D1B: Toxic Material Class E: Corrosive Material

SECTION 16 – OTHER INFORMATION
